

BRACE-GRIP® Dead-end for Strand Systems

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **BRACE-GRIP** System consists of a helically formed dead-end that develops 100 percent or more of the published rated breaking strength of the strand for which it is designed.

Features

- Provides 100% of the published rated breaking strength of the strand
- Lighter, easier to handle
- Stranded steel cable offers greater tensile strength than an equivalent sized threaded rod
- Reduces costs by improving installation time
- Eliminates the need for costly machinery
- Easily applied - no special tools needed
- No cutting or preparation - it arrives ready to install
- Accommodates 1/4" through 3/4" diameter strand
