MORAY™ AND MINI-MORAY™ SHIELD CONNECTORS
PLP Bonding Products
MORAY™ and MINI-MORAY™ SHIELD CONNECTOR

Description
The MORAY™ and MINI-MORAY™ Shield Connectors have a “spring-action” top plate that remains in contact with the shield at all times. The “spring-action” feature is designed to be flexible enough to handle the expansion and contraction of the cable sheath that results from varying temperature ranges, but strong enough to maintain constant electrical contact.

Features
The MORAY and MINI-MORAY Shield Connectors have specially designed teeth that penetrate the polymer coating on the cable shield to provide superior pull-out strength and electrical contact. The shape and angle of the tooth design bite into the cable shield during assembly. These tough teeth make it possible for the connectors to maintain constant contact.

- One-piece unit
- Easy installation
- Tough teeth prevent pull-out and maintain contact
- Constant electrical contact
- Reliability

Each Shield Connector is a one-piece design that does not require assembly. The MORAY Shield Connector is intended for cables 1.5” in diameter or greater. The MINI-MORAY is sized for cables less than 1.5” in diameter.

Installation
It only takes a “tap” to apply the MORAY and MINI-MORAY Shield Connector. Just remove the sheath and shield on the cable, leaving about 1-1/2” of the plastic inner wrap exposed. Then, tap the shield connector until it is firmly underneath the sheath and the stud is up against the cable. There is no tabbing or slitting required.

Once the connector is in place, the bond material can be attached to the built-in stud with the nuts supplied. Finally, slide the pair protector underneath the base of the shield connector and the installation is complete.

PLP Reliability
The MORAY and MINI-MORAY Shield Connectors are manufactured and tested in accordance with ISO9001:2000 procedures to assure quality, and backed by the experience and field support that PLP has been noted for since 1947.

For more information on the MORAY Shield Connector, please contact PLP.
