Applicator Ring

The PREFORMED™ Applicator Ring is a PLP®-designed tool which aids the lineman in making safe, fast, distortion-free applications of helically-formed products on energized conductors. The specially-beveled ring permits easy encirclement of the helical leg, and facilitates positioning and removal of the product. The angle-curved neck of the Applicator Ring allows the tool to be safely and easily maneuvered around conductors.

The Applicator Ring is available with a threaded base, or with a universal base, to secure it to either style of hot stick.
