

# ARMADILLO<sup>TM</sup>

## ARMADILLO<sup>TM</sup> Sealing Washers

A Whole New Species for Copper Cable.

# ARMADILLO Sealing Washers. Born tough. Bred smart.

Our new **ARMADILLO** Sealing Washer End Plates feature a new species of sealing washers. Offering a strengthened two-piece design and available in the same sizes as competitive units, the **ARMADILLO** Sealing Washers offer improved flexibility.

## Choose the **ARMADILLO** Sealing Washer because...

 The unique two-piece design is stronger than competitive units and eliminates the seam on the sealing washers;

 These washers are easy to install and they may be cut on the job site with our easy and safe washer cutter tool in just one turn and no power source is required;

 They also offer flexibility in that they may be cut with competitive cutters, are available in the same sizes as competitive units and may even be used with competitive end plates;

 Plus this new design includes a cable entry plug spool for plugging unused ports.

## Interchangeable and Compatible:

They are available in 1", 1.6", 2.2", 2.8" and 3.4" diameters. They may be cut with our craft-friendly and safe **ARMADILLO** Washer Cutter Tool on the job site or may be cut with competitive cutters. They make the **ARMADILLO** Sealing Washer End Plate easier to install and eliminate major tooling, offering a cost-competitive alternative.
