

COYOTE® ONE Closure

The COYOTE ONE Closure is the latest addition to our line of dome closures and will soon become the one to specify. The COYOTE ONE is designed with PLP's patented segmented end plate which allows independent access to each cable port. The dome design with hinged collar speeds assembly and simplifies re-entry. When combined with PLP's versatile grommet system and LITE-GRIP® splice trays, the COYOTE ONE has the capacity to support 96 single fusion or 144 mass fusion splices. Compact size and a full line of accessories make this new closure the ONE to choose.

Key Features

- **Size:** 16" L x 10" W x 5.7" H (41 cm x 25 cm x 14 cm)
- **Splice Capacity:** (120) Single fusion, (144) Mass Fusion
- **Configuration:** Butt Splice
- **Port Quantity:** 3
- **Ground Stud Quantity:** 3
- Hinged collar system allows for quick re-entry. No special tools required
- Integrated air valve to test assembly seal
- Tested in accordance to Telcordia GR-771-CORE
- Direct buried, manhole, aerial or pole/wall mount
- Flexible grommet sealing system supports a wide range and quantity of flat or round cable profiles. See grommet chart on page 3.
- Ideal for FTTH deployment and back-haul networks
