

The POLE-MOUNT Cable Separator sets cable apart with fewer parts, stronger materials, and an easier installation.

## Apply our POLE-MOUNT Cable Separator directly to the pole and eliminate the need for attachment parts.

### Direct application

The POLE-MOUNT Cable Separator keeps triplex cables apart and supports them more effectively because it mounts directly to the pole. Direct attachment eliminates costly spool insulators or metal brackets. With fewer parts, installation is faster and less expensive.

### Positive conductor placement

Large conductor grooves, 1-inch in diameter, hold conductors in place effectively. Conductors can be spaced 3-3/4" apart. There is also an extra conductor groove for quadruplex applications, and holes for tie-downs.

### Strong materials

The POLE-MOUNT Cable Separator is made from durable, lightweight urethane that is UV stabilized. The high dielectric strength makes POLE-MOUNT Cable Separators suitable for up to 750 volts. Standard color is light grey.

POLE-MOUNT Cable Separator: Catalog number 5060160.

### You can depend on PLP®

We have been committed to being a dependable supplier since 1947. All PREFORMED™ products are backed by extensive laboratory and field test data. Our sales and engineering staff are dedicated to on-going research and development to bring the most reliable products to the field. If you have special design requirements, or would like additional

information regarding the POLE-MOUNT Cable Separator, please contact PLP today.

Other Cable Separator Designs are available from PLP:

Cable Separator			
Catalog Number	Description	Wt. Per Unit	Units Per Carton
5060100	1 Dead-end hole	10 oz.	50
5060150	1 Dead-end hole + 3 tie down holes	7 oz.	50
5060150-B	1 Dead-end hole + 3 tie down holes, black color	7 oz.	50
5060160	1 Dead-end hole + tie down holes, bolts directly to the pole.	10 oz.
