

COYOTE® ONE Closure

The COYOTE ONE Closure is the latest addition to PLP's line of dome closures and will soon become the one to specify. The COYOTE ONE is designed with PLP's patented segmented end plate which allows independent access to each cable port. The dome design with hinged collar speeds assembly and simplifies re-entry. When combined with PLP's versatile grommet system and LITE-GRIP® splice trays, the COYOTE ONE has the capacity to support 120 single fusion or 144 mass fusion splices. Compact size and a full line of accessories make this new closure the ONE to choose.
