

POWER RAIL™ Mounting System (PRM)

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **Power Rail™** top-clamping mounting system is designed with the professional PV solar installer in mind. The top-clamping rails utilize a single tool with a revolutionary RAD™ Fastener for faster bolt placement. The unique shape of the RAD provides an anti-rotation feature, locking the bolt in the proper orientation when installed. The high strength rigid rails also include an integral wiring channel for securing cables and providing a professional finish. The Power Rail Mounting System features the industry's broadest selection of mounting supports, designed for secure and water tight attachments to any roof style.

Design Your Next Project

Power Rail™ Design Tool

- Optimize your roof and structure mount layouts and material selections.
- Built-in code compliant engineering and simple user interface.

Get Started!

Features

- High strength, top-clamping mounting system
- Parallel to roof or tilted applications
- Eight rail options for optimal span-to-cost ratio - P4, P6, P8, P14, XD, UD, LD, & MD
- Single tool assembly
- Heavy duty stainless steel hardware with tighter module spacing
- Mounting feet and attachment options available for any style roof application
- Residential and commercial applications

- Patented RAD™ Lock-in-Place Bolt
- Integrated grounding
- UL2703 Code Compliant
