

COYOTE® Closure End Plate Grommets

Easily expand the capacity of the COYOTE® Closure Three-Section End Plate

Designed for versatility

A family of COYOTE Closure End Plate Grommets is available to expand the capacity of the COYOTE Closure Three-Section End Plate for applications with smaller diameter or insulated ground wires. The grommets are designed to provide up to three cable entries for standard "A" Port (7/8") and "B" Port (3/4") cable entries (see chart).

Ensures a lasting seal

The grommets are manufactured from a weather-resistant, resilient urethane material that will ensure a tight and permanent seal. A Moisture Blocking Sealant (sold separately) is used to lubricate the grommet and cables for easy installation.

A choice of entries

The entry holes in the multi-entry grommets are covered with a thin layer of urethane to provide a choice of which entry or entries are used initially. This feature also allows the grommets to be used for future entries.

PLP® reliability

PREFORMED™ products pass a series of tests conducted

Grommets for "A" Port (7/8")		
Catalog Number	Number of Entries	Cable Diameter Range (inches)
8003395	1	0.31 - 0.38
8003393	2	0.31 - 0.38
8003389	3	0.27 - 0.31
8003390	3	0.20 - 0.27

Grommets for "B" Port (3/4")		
Catalog Number	Number of Entries	Cable Diameter Range (inches)
8003394	1	0.31 - 0.38
8003392	2	0.27 - 0.31
8003391	3	0.20 - 0.27

in our laboratory. Our facility is one of the industry's most advanced testing centers.

Combine these capabilities with our experienced engineering and field-support staff, and you've got PLP reliability. That's why PLP has been a dependable supplier since 1947.
